Traffic Lane Cleaner & Carpet Pre-Spray *Limpiador de Alto Trafico y Desmanchador*

DESCRIPTION

This product is a synergistic chemical system capable of breaking up entrapped soils from fibrous surfaces such as carpet and upholstery. It is effective as a prespotter prior to routine shampoo or extraction or as an emergency cleaner for trouble spots and traffic lanes between cleanings. The buffered alkalinity ensures both ample cleaning power and mildness to stain resistant fibers. This product is enzyme fortified to assist in removing malodors.

DIRECTIONS

Pretest an inconspicuous area of carpet to determine colorfastness of the material.

MODERATE SOILS: Use 11 oz. of product per gallon of water. Prespray carpet. Allow a 15 minute dwell time for maximum results. Follow this product with your regular cleaning procedures: Extraction, Shampooing, or Spin Pad Cleaning.

HEAVY SOILS: Use 13 oz. of product per gallon of water.

NOTE: For best results use this product within 8 hours of mixing. Avoid over-wetting carpet as it will cause shrinkage. Follow manufacturer's directions for use of machine.
